## INTEROFFICE MEMORANDUM

DATE January 31, 1996  
TO Steve Hahn, ER/WM&I, Operations  
FROM Mary Lee Hogg, ER/WM&I, Planning and Integration  
SUBJECT Review of RMRS Response to Comments on RFI/RI, Operable Unit 6,  
MLH-003-96

---

Per your request, I have conducted a thorough review of RMRS' response to comments on the Human Health Risk Assessment for the OU6 RFI/RI. Particular attention was given to extensive comments received from reviewers at CDPHE. My suggested changes were primarily on points of clarification or were editorial in nature. I submitted my comments on these responses to Neil Holsteen at RMRS and my suggestions and comments have been incorporated into the response to comments to my satisfaction. The response to comments also reflected recent input from DOE on certain exposure parameters being questioned by EPA and CDPHE (reference memorandum from S. Slaten to EPA and CDPHE dated January 22, 1996). In conclusion, I have a high degree of confidence that the comment responses are complete, accurate, and adequate to address the concerns of EPA and CDPHE.

cc: D. Whaley
